

Smart thermostats

Rebates for your home

Smart thermostats must be installed on a residential natural gas space heating system with an input capacity less than 300 MBTUH, replacing a programmable or manual thermostat, equipped with a configurable schedule of temperature set-points, capable of automatically adjusting the heating and cooling system temperature (either through occupancy sensors in the home or geo-fencing technology) and capable of two-way communication via a Wi-Fi connection to be eligible for a rebate. Additional requirements apply. Download the rebate application at nicorgasrebates.com/apply for the program terms and conditions.

energySMART offerings and availability of funding are subject to change. To ensure eligibility, please use the most current qualifying products list available at <http://nicorgasrebates.com/your-home/rebates-for-home>

energySMART, a Nicor Gas program, is a multi-year program funded by Nicor Gas customers in compliance with Illinois law.
